## SUMMARY

Final-year Software Engineering student at FAST-NUCES, Islamabad, specializing in full-stack web development and AI-driven systems. Proficient in the MERN stack with hands-on experience in cloud-native technologies (Docker, Kubernetes) and RAG-based applications. Experienced in building scalable web applications and integrating AI solutions for real-world problems.

## TECHNICAL SKILLS

**Frontend:** React, JavaScript, HTML5, CSS3, Redux, Context API, Tailwind CSS, jQuery, Ajax  
**Backend:** Node.js, Express.js, RESTful APIs, JSON  
**Database:** MySQL, MongoDB, FAISS (Vector Database)  
**DevOps & Tools:** Git, GitHub, Docker, AWS (All Major Services), Jira, Scrum, Postman  
**AI / Machine Learning:** Retrieval-Augmented Generation (RAG), Multimodal AI, Transformers, Prompt Engineering

## EXPERIENCE

**DevMind** Islamabad, Pakistan  
*Intern – AI Full Stack Developer* Sep 2025 – Nov 2025

- Developed and maintained full-stack web applications using the MERN Stack, integrating AI solutions to enhance system functionality.
- Contributed to the full software development lifecycle by assisting in debugging and testing to ensure application stability.

**Nayatel** Islamabad, Pakistan  
*Intern – Full Stack Developer* Jul 2025 – Aug 2025

- Developed and maintained full-stack web applications using the MERN stack and collaborated with cross-functional teams on real-world projects.
- Contributed to codebase improvements and bug fixes under mentorship of senior developers.

## PROJECTS

**Fiverr Automation: AI-Powered Gig Optimization** | *Node.js, OpenAI API, Puppeteer*

- Built an intelligent AI-powered gig optimization browser extension leveraging OpenAI API and Node.js backend to optimize Fiverr gigs through AI-generated content and competitor analysis.
- Implemented automated keyword research, pricing recommendations, NLP-based scam detection, A/B testing framework, and analytics dashboard with Puppeteer scraping and version control.

**AI Crop Advisory System – Multimodal RAG-Based Farming Assistant** | *RAG, FAISS, LLM APIs*

- Developed an AI-powered crop advisory system using RAG and multimodal AI for image, voice, and text-based queries with semantic search via Sentence Transformers and FAISS.
- Integrated LLM APIs for context-aware recommendations and utilized pretrained vision models for crop disease detection.

**DPI Engine – Deep Packet Inspection System** | *C++, Multithreading, TLS/SNI*

- Built a multithreaded Deep Packet Inspection engine that identifies and blocks applications from encrypted HTTPS traffic via TLS SNI extraction — the technology behind ISP firewalls.
- Processes 100,000+ packets/sec using lock-free flow-affinity worker threads and byte-level protocol parsing.

**E2E Encrypted Messaging & File Security System** | *React, Node.js, MongoDB, AES-256-GCM*

- Built a secure messaging platform with client-side AES-256-GCM encryption, encrypted file sharing, and HKP-256 authenticated key-exchange protocol using ECDH, ECDSA, and triple nonces to prevent MITM and replay attacks.

**Airbnb Clone – Full-Stack Booking Platform** | *MERN Stack, REST APIs*

- Developed a full-stack booking platform with user authentication, property listings, advanced search/filter, booking workflow, and secure RESTful APIs.

## EDUCATION

**FAST National University of Computer & Emerging Sciences** Islamabad, Pakistan  
*BS Software Engineering* Aug 2022 – Jun 2026

**Sadiq Public School** Bahawalpur, Pakistan  
*FSc Pre-Engineering* Mar 2019 – Jun 2021

## HONORS & CERTIFICATIONS

**Dean's List of Honors** – Fall 2025, FAST-NUCES  
**The Complete Full-Stack Web Development Bootcamp** – Udemy
